

TANNIN

Tan&Sense® Volume

Tan&Sense® Volume is a selection of high quality ellagic tannins that participate into the balance of the oxidation-reduction potential.

PRODUCT CHARACTERISTICS

- **Formulation:** Pure oak tannins from stave quality.
- **Enological benefits:** Tan&Sense® Volume is a high-quality preparation of ellagic tannins, with anti-oxidant and anti-oxidase properties (inhibition of Laccase) and good reactivity with proteins (facilitates clarification).

It can be used to re-create an antioxidant environment rich in ellagic tannins, identical to that of new barrels, when the barrel stock is worn out.

It can be used on white, rosé or red wines, and in particular on wines vinified or matured in barrels (in synergy with the ellagitannins in the barrels).

DIRECTIONS FOR USE

- Instantly soluble, Tan&Sense® Volume is ready to use. Dissolve in 10 times its weight in water. Add into the tank during a pump-over or during a transfer in order to have a perfect homogenisation. It can be used during ageing or a few weeks before bottling.
- **Dosage:** *Red wines:* 5 to 20 g/hL. *Rosé and white wines:* 3 to 5 g/hL.
The dosage of tannins depends of each type of wine and winemaking imperatives to be achieved. Take advice from your oenologist in order to comply with the oenological codex (OIV).
Lamothe-Abiet provides single-dose samples (for one bottle) to simplify the calculation of the treatment.
